

Checkout Scale Ariva-S

The Ariva series is available both as a tabletop device and as a cash table mounting variant.

It has an aluminum alloy casing and a stainless steel charging plate, so the Ariva series also withstands the daily demands of the box.

Features

- Wide weighing range – precise weighing resolution with light goods
- Firm structure – resistant to dirt and liquids
- Versatile in adjustment – on the box, as a control scale
- Easy integration – compatible with all common point of sale systems

Specifications

Weighing Range

Maximum Load 6 kg/15 kg

Division 2g/5g

Minimum Load 40g

Clear, backlit display with energy saving function

5-digit weight indication

Tare and zero keys

Screen for Calculator Applications

Weighing Range

Maximum Load 3kg/6kg

Division 1g/2g

Minimum Load 20g

Clear, backlit display with energy saving function

5-digit weight display, 6-digit base price and total amount, as well as 4-digit tare display.

Tare and zero keys

Optional article text indication

Dimensions

Weighing Platform 280mm x 316mm

With Optional Weighing

Platform Mounting Assembly 276 mm x 327 mm

Minimum Height 58mm

Height adjustment and leveling with adjustable feet

Indication Through Cash Monitor

Scale information display through the cashier terminal with

VCODisp (Virtual Checkout Display)

Tare and reset with touch buttons on the VCODisp weight window or optional Keypad

Interfaces

RS-232

USB 2.0

Adapter cable for box connection optionally available

Electrical Characteristics

Power Supply 100 - 240 V AC/12V DC

Consumption Power 1.2 Watts

Housing

High stability thanks to die-cast aluminum housing

Housing with non-stick coating

Temperature Range

-10°C - +40°C

0 - 85% humidity, non-condensing

Others

Communication All common cash register protocols (including Dialog protocols 02, 04, 06, etc.) are implemented

Automatic zero adjustment Ensures a stable zero point

Approvals OIML, NTEP, CE
