

## Price Computing Scale With Pole

### Features

- Patented design to prevent insect entry that extends the working life of the scale.
- 3.6-inch operator and customer dual-screen display, easy to read unit price, weight and total amount.
- 8 memory unit price key, convenient to operate when busy; with the patented active keyboard, predetermined unit price keys can be used, improving sales efficiency.
- Well-designed combination function keys, comfortable and easy to operate, plus daily total billing verification function included.
- Able to re-display the transaction process including unit price, part weight, total price, unit price and serial number, more clearly than other scales on the market.
- Lower cost: 3 D type dry batteries can drive the scale for 2-3 years. The life of traditional lead batteries is only 2 years and need professional people to replace, expensive and often break down.

## Specifications

### GENERAL

Internal Resolution	1/30000
Weighing Range	6kg/15kg; 15kg/30kg
Weighing Capacity (Max.)	2g/5g; 5g/10g
Weighing Capacity (Min.)	40g; 100g
Tare Value (Max.)	-5.998kg; -9.995kg
Power Supply	3 PCS D batteries
Battery Estimated Use Time	Approximate 2 years (8 hours each day, 30 times each hour, 10 seconds each time)
Power Consumption	Soft turn off < 5μA; standby: 21μA; work status:4.6mA; with backlight<5.5mA
LCD Backlight	With backlight
Dimension	With pole: 348.5 x 386.7 x 478.5mm Without pole: 348.6 x 358 x 121.8mm
